

Improve your skills with upcoming training sessions from NCI

National Comfort Institute is offering training for TECH Clean California contractors.

National Comfort Institute, Inc. (NCI) provides heating, air conditioning, plumbing, and electrical contractors with services and tools to help them improve their businesses, differentiate themselves, grow, and become more profitable. NCI accomplishes this through membership groups and by providing unique tools (business management, sales, marketing, and technical), training, support, and coaching - all designed to help customers differentiate their companies through measured performance, quality, and value.

Courses Offered:

High Performance HVAC Design and Redesign for Electrification

During this three-day training you will learn to accurately complete four stages of system design using NCI and ACCA Manual J, S, D, and T. This course, normally \$1,000, is being offered for free - lunch included. Upon completion of this course, each contracting company is eligible for up to a \$500 rebate for the purchase of any ACCA Compliant Full Residential Load Calculation software.

March 5 - 7, 2024 / Ferguson Enterprises Sacramento - 5005 Raley Ave., Sacramento 95838
